

Health Sector Economic Indicators SM

Insights from Monthly National Health Employment Data through March 2023

LABOR BRIEF

April 21, 2023

Health care job growth continues modestly across all major settings of care

HIGHLIGHTS

- ▲ Health care added 33,900 jobs in March 2023, somewhat less than the roughly 54,000 jobs per month that were added in the first two months of 2023 and the 12-month average of 51,000 jobs.
- A March health care job growth was seen in all major settings of care, with ambulatory settings adding 15,000, hospitals adding 10,900 and nursing and residential care facilities adding 8,000 jobs.
- ▲ The economy added 236,000 jobs in March, somewhat lower than the growth seen in January and February. In the first quarter of 2023, the economy added an average of 345,000 new jobs per month, equal to the 12-month average of 345,000 jobs. The unemployment rate dipped slightly to 3.5%.
- ▲ Wage growth in health care has been declining since mid-2022 and has been below economywide wage growth since January 2023. In February 2023, health care wages grew by 4.3% year over year while total private sector wages grew by 4.6%. Wage growth varied by setting of care, growing by 3.8% in ambulatory care settings, and 4.7% in both hospitals and nursing and residential care.

Cyclical Employment Big Picture

Seasonally Adjusted	Feb 2020	Mar 2022	Feb 2023	Mar 2023
Total Employment (000)	152,371	151,424	155,333	155,569
Non-Health Employment (000)	135,890	135,306	138,633	138,835
Health Employment (000)	16,481	16,118	16,700	16,734
Health Share of Total Employment	10.82%	10.64%	10.75%	10.76%
Unemployment Rate	3.5%	3.6%	3.6%	3.5%

DISCUSSION

Health care employment grew by 33,900 jobs in March 2023, somewhat lower than the roughly 54,000 jobs per month added in January and February and lower than the 12-month average of 51,000 (Exhibit 1). Nearly half of health care job growth was seen in ambulatory care settings, which added 15,000 jobs, led by home health care, which added 15,200 jobs while other ambulatory setting saw small gains or losses. Hospitals added 10,900 jobs in March while nursing and nursing and residential care facilities continued the steady employment growth that began about a year ago, adding 8,000 jobs (Exhibit 7).

Health care employment is 253,000 jobs, or 1.5%, above where it was three years ago before the pandemic began (February 2020) (Exhibit 2). Hospital employment is just above where it was (54,000 or 1.0% above), ambulatory care settings are well above (461,000 or 5.9% above), and nursing and residential care employment, while growing steadily now, remains 262,000 or 7.8% below where it was prior to the pandemic (Exhibit 3).

Wage growth in health care had been higher than overall wage growth for many months but fell below the economywide average in 2023. Earnings in health care rose 4.3% over the year in February 2023, compared to 4.6% for all private sector jobs (Exhibit 4).

Exhibit 4. Change in Average Earnings, Year over Year, Health Care and Total

The growth in average earnings varied considerably by setting of care in 2021 and 2022, but the gaps have narrowed as wage growth fell in all settings (Exhibit 5). Wage growth in nursing and residential care, previously the highest of all the major health care settings, is now equal to wage growth in hospitals, at 4.7% year over year in February 2023. Wage growth has been slowest in ambulatory care, now at 3.8% year over year.
